

Tyler Arroyo

(203) 830 9020 | tarroyo0907@gmail.com

Objective:

Seeking a software development internship position utilizing skills in C#, C++, and/or Unity/Unreal Engine.

Education:

Rochester Institute of Technology (RIT), Rochester, NY

Golisano College of Computer Information Science

Bachelor of Science, Game Design and Development

Expected 2026

Skills/Certifications:

Programming Languages: C#, Java, HTML, CSS, C++, Javascript, Python, Typescript

Tools: Unity, Git, Blender, Maya, Visual Studio, Trello, Unreal Engine, Docker, MySQL

Projects:

Warcry Duel (Unity Personal Project)

June 2022

- Created an online multiplayer game using Unity to handle Netcode and Client-Server communication.
- Utilized Unity's dedicated server hosting functionality to allow players to play against each other from separate locations and devices.

The Traveler (Unreal Personal Project)

Fall 2023

- Created a first person adventure game that focused on learning Unreal's terrain system and getting introduced into Unreal on my own.
- Created a working inventory system and worked with shaders to handle looting and picking up items.

Dungeon Descent (Academic Project)

Spring 2023

- Collaborated with a team of 4 people to create a game using Monogame.
- Focused on UI and UX development and ensuring that different game states flowed properly.

Inventory Management Software (SAAS Personal Project)

Summer 2024

- Used Python, MySQL and Docker to start an inventory management software with data visualization features. Used Flask as a web framework to connect our database to a web frontend.

Gridcast (Academic Project)

Fall 2024

- Created a local multiplayer turn-based strategy game with a team of 4 using the Unity Game Engine.
- Handled the entire back-end multiplayer framework that tied into the other ends of development.

Work Experience:

Production Metals

June 2023

Inventory Facilitator | Full-Time

- Used a SQL database to properly manage thousands of pounds of metal and process it through their warehouses.
- Worked and communicated with both upper warehouse management and the team of manufacturers to keep the metal organized and accounted for.

Activities:

RIT VALORANT Esports : Participant, live state tournament competition. **Fall 2023**
